## **SUMMARY OF CLAIMED SUBJECT MATTER**

### **Claim 1**

A composition is provided which contains complexes of a nucleic acid molecule and one or more polycation molecules. (Page 3, line 13-14). The complexes have particular properties and they are made by a particular method. The properties of the complexes include:

- unaggregated (page 2, line 15-16);
- rod-shaped (when visualized by transmission electron microscopy)  
(page 7, line 27-29);
- 10-20 nm diameter (when visualized by transmission electron  
microscopy) (page 16, line 1-2);
